

WE'RE HIRING

QA Automation Senior Engineers

(Location – Srilanka)

www.lowcodeminds.com

Are you ready to work on Emerging Low-code technologies?

We are focused on delivering innovative low-code hyper automation solutions using an enterprise grade low-code platform called Appian (<https://appian.com>) . Low-code is the new way to build agile applications to accelerate the business needs. Forrester predicts that by the end of 2021, 75% of development will start using low code platforms. Compared to traditional development, it is 10 times faster, costs half as much to maintain , and can deliver more powerful functionalities (including RPA, AI/ML, IoT etc..) to handle mission critical & complex applications.

We will train you in Appian Functional & NFR Test capabilities and will coach you to get certified to accelerate your career path.

What are we looking for?

- A Bachelor's Degree in Computer Science or equivalent.
- 2+ years of extensive hands on experience in writing Automated test cases in **Selenium & Cucumber**.
- Experience working in cross browsers (responsive) and mobile application testing.
- Hands on experience in application performance testing by using **JMeter** and understanding of Chaos Engineering concepts.
- Understanding of OWASP Vulnerability testing and concepts.
- Experience working in DevOps environment with CI/CD pipelines.
- A team player with excellent communication and leadership skills.
- Work collaboratively in cross functional global teams in an Agile delivery environment.
- Self-motivation and learning capability, ability to work independently.

If you are a team player who is eager to learn, get certified and to accelerate your career path, please send your CVs to bala_vignesh@lowcodeminds.com with the position applied for in the subject header

" Boundless Innovation & Relentless Growth "
